Symposium on Cybersecurity & Data Protection in Humanitarian Action

08.11.2022
Luxembourg

New technologies have transformed humanitarian action and can facilitate humanitarian work. But the digital transformation also generates novel risks – risks that need to be addressed in collaboration with new partners.

The Symposium brings together experts from the public, private and humanitarian sector, as well as academia and civil society, to reflect and offer solutions on key legal, strategic and operational issues humanitarian organization face as a consequence of the digital transformation.
