A 350 kVA generator the ICRC donated to the Mokha Hospital in Taiz as part of its support to the hospital.

**WATER, SANITATION AND CONSTRUCTION**
CONSTRUCTION & REHABILITATION PROJECTS
(including mechanical repairs, electrical works, water, and sanitary work, civil work) were conducted by the ICRC in 17 health facilities, 8 water projects/Local Water and Sanitation Cooperation branches, 4 detention facilities, 3 YRCS branches, and an IDP camp.

ELECTRICAL WORKS
were carried out in 11 water projects/Local Water and Sanitation Cooperation branches, 21 health facilities, and 6 different local facilities. The electrical works included the donation of generators, solar systems, spare parts, UPSs, lead-acid batteries, electrical cables, and combiner boxes along with rehabilitation and maintenance work to ensure a sustainable source of electricity.

GENERATORS
with a total power of 1,567KVA were donated to different water projects, Local Water and Sanitation Cooperation branches, prisons, and health facilities.

SUBMERSIBLE PUMPS
were donated to 3 water projects and a detention facility. In addition, a branch of the Local Water and Sanitation Cooperation was supplied with control panels for 15 submersible pumps.

SOLAR SYSTEMS
were donated and installed at a health facility, a prison, and a YRCS branch. While 3 other solar systems were supported with expansion to its grid with new solar panels or inverters.

LITERS OF WATER
were donated and distributed to a prison and a hospital through the emergency water trucking response.

TENTS
were donated to 3 health facilities for isolating COVID-19 patients and for screening patients coming into the facility.
